REACH EC-Regulation 1907/2006 SVHC – Candidate List of Very High Concern for Authorisation

Based on information from our raw material suppliers, we hereby confirm that the following products respectively product families according to our current delivery programs:

Lignostone®	Durostone® AG	Durostone® UP	Durostone® VE	Durostone® EP
Durostone® EPX S11	Durostone® EPR S3	Glastherm® HT	Formaterm®	Trovicel®
Trovidur® EC-Clad	Trovidur® ET	Trovidur® EA	Trovidur® EPC	Trovidur® NL
TroBloc®	Polystone® D	Trovidur® PHT	Trovidur® W1014	Trovidur® PVC-U-Rod
Polystone® P	Polystone® PPs	Polystone® E	Polystone® PVDF	Polystone® G
Polystone® M	Polystone® ABS	Play-Tec®	LubX®	Matrox®
SUSTAMID	SUSTARIN	SUSTADUR	SUSTANAT	SUSTAABS
SUSTAVACU	SUSTAPVDF	SUSTAPEEK	SUSTASON	SUSTAPEI
SUSTAPPE	SUSTATRON	SUSTAGLIDE	SUSTAKON	EtroX® V
Foamlite®	Hydroma® Quality Cutting Boards	Hydroma® Hygienic Cutting Boards		

a) do not contain any of the 211 substances stated in the current [candidates' list](#) ([press release ECHA/NR/21/05 dated 19. January 2021](#)) in a non-conform single concentration of more than 0,1 in percentage of weight.

b) do not contain any of the 70 substances and/or groups of substances, in unauthorised quantities or applications, which are stated in the current version of the ANNEX XVII of the REACH guideline, dd. 25 March 2020.

Should the [Candidates' list](#) or the [Annex XVII](#) changed and substances new listed there be contained with a non-conform percentage in weight or other restrictions in our products, we will inform you.

Please note: Generally, traces of undesired substances that are ubiquitous in minimal quantities through propagation can never be completely precluded from our products. Moreover, we point out that analytical monitoring of our products for any potential contamination is not the subject of our outgoing inspection.

You will find further information concerning this on our website www.roechling.com and under www.echa.europa.eu.

We will be only too glad to answer any of your queries.

Product information

REACH – Obligation to inform for processor of PVC sheets

Dear Customer

PVC-sheets have proved themselves, especially for the production of door panels and window profiles, wall cladding elements as well as for engineering, apparatus construction, tank building, interior fittings and promotion.

To guarantee the life time of PVC-sheets metalliferous compounds are being used as stabilisers. According to the Chemicals regulation REACH these are partial worrisome materials, so called SVHC-substances.

Herewith we refer to these compounds according to the REACH-information requirements. These compounds have been integrated in the polymer matrix and bring out no risk at all for humans and environment.

These stabilisers match the state of technical knowledge and have been registered since many years for the production of PVC-sheets for comestible contact. Therefore, the use of PVC-sheets as well as the basic material is fully harmless and safe. This affects the life time of the PVC-sheets as well as the recycling process.

Information requirements according to Art. 33 REACH-regulation (EG no. 1907/2006):

the following types of PVC (PVC-hard / PVS-soft):

Trovidur® EC-N	Trovidur® EC-FG	Trovidur® EC-FR	Trovidur® EN Liner Red
Trovidur® ES	Trovidur® ESV	Trovidur® ESA	Trovidur® ES-M
Trovidur® ES-FB	Trovidur® Astrawood	Trovidur® PN	Trovidur® W1590
Trovidur® W2000	as well as their welding additions		

contain more than 0,1% of the following substance:
Diocetyl-tin-combinations (DOTE – CAS no. 15571-58-1)

No special precautions have to be taken for the use of the article because the substance is integrated in the plastic and will not be released during normal use.

Should you have any questions regarding the REACH-regulation in our company, please do not hesitate to contact us.

This information was made automatically and therefore does not show a signature.
